Lanzarote – The Land of Volcanoes Self Guided Tour 2025

243 – 320km | 8 days / 7-nights

Enjoy a ride through some of the most dramatic landscapes to be found in Europe. These islands are of volcanic origin. Lanzarote suffered a series of eruptions in the 18th century and as a result has some fascinating landscapes with volcanoes everywhere we look and immense lava flows – some of the most unique riding you are likely to encounter anywhere.

The unique architectural works of César Manrique form a valuable complement to the volcanic environment, and his enduring influence and ecological concern has meant that the island has escaped the excesses of modern-day mass tourism.

Last but not least, the benign climate, neither hot in summer nor cold in winter, means that cycling is possible all year round. Our combination of rides and free days mean you can choose whether you ride or take the occasional day off. Definitely a trip not to be missed!
