Requirements

The cycling routes require a basic level of fitness, which you should have acquired by steady cycling. The routes can reach an altitude of 200 to 500 meters. The daily routes, of 20 - 60 km, cover some hilly terrain and can be completed without time constraints. You will also come across some longer and climbs, where walking your bike is of course advised. The cycle path and roads are mostly asphalted and there is little traffic outside of holiday periods.

WHAT TO BRING

We would recommend that you bring padded cycling shorts and / or a gel saddle cover which will make your days cycling more comfortable. Cycling gloves are also a good investment, as are hard-sole shoes which will help protect your feet. And don't forget raingear including a rain jacket, rain pants and slip-on boots. A hat and sunglasses will protect you from getting too much sun. Finally, please make an effort to pack lightly. This will make your travels easier and will be much appreciated with the luggage transfers.
